RECOGNITIONS AND SPONSORSHIPS

Github Sponsors (+2)

I receive monthly sponsorship from members of the developer community for my open-source contributions. This support highlights the value and impact of my work.

PROFILE

Experienced Fullstack Developer, passionate about Open Source contributions. Self-taught coder since age 16.

Bringing 11 years of experience, I'm dedicated to helping companies build their products, primarily focusing on Frontend.

As contributor, I've created several Open Source projects including: vercel-cors, router-dex, bananasplit-js, among many others. I've also contributed to well-known libraries such as alias-hq and yup.

EXPERIENCE

Senior Software Engineer, Peoplebox

2022 - 2024 | San Francisco, EEUU [remote]

Responsible of architecting and coding the core of the product, mentoring developers, reviewing code, and sharing knowledge about best practices. Peoplebox's product is utilized by world-wide renowned companies like Disney+ Hotstar and Postman.

Frontend Developer, Unboxable

2021 - 2022 | Tel Aviv, Israel [remote]

Responsible for designing and coding customized frontend & automation solutions tailored to meet the specific requirements of the company at it's particular point of growing. Provided unique solutions that could not be found elsewhere by the team.

Founder & Backend Developer, Ensamblar

2019 - 2020 | Santiago, Chile

Founder of a small team of developers, overseeing decision-making, and backend developer. Responsible for managing the entire architecture of the services the company offers to customers, while also leading my fellow founders.

Fullstack Developer, Neoproxyer

2018 - 2019 | Santiago, Chile

Second time around. Worked closely with UI designers on website and application development, crafting solutions for various local businesses in Chile. My collaboration has earned the company a reputation for being flexible and proficient in our work.

OPEN SOURCE CONTRIBUTIONS

vercel-cors [↗](#)

Lightweight library to handle CORS inside vercel serverless functions.

router-dex [↗](#)

Route and middleware inspector for Express.js. Made for Terminal.

bananasplit-js [↗](#)

Minimal Express.js framework that integrates Typescript, Sequelize and Jest for a quick app development.

yup-es [↗](#)

ES-es locale integration for yup.

ioquake3-server-gcloud [↗](#)

The fastest way to deploy your own ioquake3 server using Docker, Kubernetes and Google Cloud.

ioquake3-mac-install [↗](#)

Install ioquake3 on macOS in one command (apple silicon support).

neofusion.nvim [↗](#)

Neovim theme blending lava red and ice blue for a vibrant coding experience.

nvim-file-location [↗](#)

Neovim plugin to copy the file path and line number where the cursor is to the clipboard.

Fullstack Developer, Freelancer

2013 - 2015 | Angol, Chile

Crafting unique websites and UI designs for my clients. Consistently utilized the latest development tools and well-established technologies in all projects. Author of open source jQuery plugins and PHP libraries.

Fullstack Developer, Neoproxy

2011 - 2013 | Santiago, Chile [remote]

Developing websites using the latest web technologies of the time. Serving a variety of local businesses including hotels, real estate portals, and metallurgical factories. Highlighting well-known companies in Chile like Cardinale®.
