

## PROFILE

Experienced Fullstack Developer with a passion for Open Source contributions. Self-taught coder since age 16.

Bringing 11 years of experience, I'm dedicated to helping companies build their products, with a primary focus on Frontend side.

As contributor I have created several Open Source projects like: vercel-cors, router-dex, bananasplit-js, to name a few of many. I have also contributed to well-known libraries of the Javascript Universe, like alias-hq and yup.

## MAIN SKILLS

### Frontend Frameworks

React · Next.js · Astro · Svelte · SvelteKit

### Backend Technologies

Node.js · Express.js · Deno

### Databases

MySQL · Postgres · MongoDB · SQLite

### Testing Tools

Jest · Playwright · Vitest

### Clouding & Infrastructure:

Vercel · Netlify · AWS · Google Cloud

### Languages

Typescript · Javascript · Sass · GraphQL

## RECOGNITIONS AND SPONSORSHIPS

### Github Sponsors (+2)

I receive monthly sponsorship from members of the developer community for my open-source contributions. This support highlights the value and impact of my work.

## PROFESSIONAL EXPERIENCE

### Peoplebox,

*Senior Software Engineer*

2022 - 2024

San Francisco, EEUU [remote]

Responsible of architecting and coding the core of the product, mentoring developers, reviewing coworkers code, and sharing knowledge about best practices to the team mates.

The product is utilized by world-wide renowned companies like Disney+ Hotstar and Postman.

### Unboxable, Frontend Developer

2021 - 2022

Tel Aviv, Israel [remote]

Responsible for thinking up and coding customized frontend/backend solutions tailored to meet the specific requirements of the company's product at his particular point of growing. Providing unique solutions that could not be found elsewhere by the team.

## OPEN SOURCE CONTRIBUTIONS

### **vercel-cors**

Lightweight library to handle CORS inside vercel serverless functions.

<https://github.com/diegoulloao/vercel-cors> 

### **router-dex**

Route and middleware inspector for Express.js. Made for Terminal.

<https://github.com/bananasplit-js/router-dex> 

### **bananasplit-js**

Minimal Express.js framework that integrates Typescript, Sequelize and Jest for a quick app development.

<https://bananasplit.js.org/> 

### **yup-es**

ES-es locale integration for yup.

<https://github.com/diegoulloao/yup-es> 

### **ioquake3-server-gcloud**

The fastest way to deploy your own ioquake3 server using Docker, Kubernetes and Google Cloud.

<https://github.com/diegoulloao/ioquake3-server-gcloud> 

### **ioquake3-mac-install**

Install ioquake3 on macOs in one command (apple silicon support).

<https://github.com/diegoulloao/ioquake3-mac-install> 

### **neofusion.nvim**

Neovim theme blending lava red and ice blue for a vibrant coding experience.

<https://github.com/diegoulloao/neofusion.nvim> 

### **nvim-file-location**

Neovim plugin to copy the file path and line number where the cursor is to the clipboard.

<https://github.com/diegoulloao/nvim-file-location> 

### **Ensambler,**
